

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) An adhesive roller construction comprising:

an elongated strip, said strip having a backing layer and adhesive layer overlying one side of said backing layer, said strip having a first end, a second end and two spaced apart sides, said strip being wound from said first end to said second end into a tubular cylindrical roll,

wherein said backing layer comprises a compressible foam layer.

CLAIMS

- 1 1. An adhesive roller construction comprising:
2 an elongated strip, said strip having a backing layer and adhesive layer
3 overlying one side of said backing layer, said strip having a first end, a second
4 end and two spaced apart sides, said strip being wound from said first end to
5 said second end into a tubular cylindrical roll,
6 wherein said backing layer comprises a compressible ^{foam} layer.
- 1 2. The invention as defined in claim 1 wherein said compressible
2 layer comprises a foam layer.
- 1 3. The invention as defined in claim 2 wherein said foam layer
2 comprises a closed-cell foam layer.
- 1 4. The invention as defined in claim 1 and comprising a release
2 agent covering at least a portion of the other side of the backing layer.
- 1 5. The invention as defined in claim 4 wherein said release agent
2 comprises silicone.
- 1 6. The invention as defined in claim 1 and comprising an
2 antimicrobial coating on said one side of said backing layer.
